

# Develop the Python Script

(Develop a Python script)

Date	04 November 2022
Team ID	PNT2022TMID05194
Project Name	Industry-specific intelligent fire management system
Maximum Marks	4 Marks

## Industry-specific intelligent fire management system

Create a code snippet using python to

1. Extract weather data from OpenWeatherMap using APIs
2. Send the extracted data to the cloud
3. Receive data from the cloud and view it in the python compiler

HARIHARAN A:

The screenshot shows a web browser window with the OpenWeatherMap website. The address bar shows 'home.openweathermap.org'. A green notification bar at the top states: 'We have sent the confirmation link to hariharan07ananth@gmail.com. Please check your email.' Below this, there is a navigation menu with links: 'New Products', 'Services', 'API keys', 'Billing plans', 'Payments', 'Block logs', 'My orders', 'My profile', and 'Ask a question'. The main content area features a large image of a sunset/sunrise over a body of water, with the text 'Historical weather for any location' in orange. Below this, it says 'Our new technology, Time Machine, has allowed us to enhance the data in the Historical Weather Collection.' and lists two bullet points: 'Historical weather data available for ANY coordinate' and 'The depth of historical data have been extended to 40 YEARS'. At the bottom, it says 'You can download data from Personal account or contact us to order it.' There are two orange buttons: 'Learn more' and 'Go'. A OneDrive notification box is visible on the right side, stating 'Screenshot saved' and 'The screenshot was added to your OneDrive.' The Windows taskbar at the bottom shows the date and time as 14:37 on 09-11-2022, and the weather as 32°C Cloudy.

## Weather in your city

chennai Search

Chennai, IN haze

31°C temperature from 31 to 31 °C, wind 5.14 m/s, clouds 40 %, 1010 hpa

Geo coords [13.0878, 80.2785]

Search engine is very flexible. How it works:

- To make it more precise put the city's name, comma, 2-letter country code (ISO3166). You will get all proper cities in chosen country. The order is important - the first is city name then comma then country. Example - London, GB or New York, US.
